

S-cool Plan-it is a curriculum-based electronic Individual Learning Plan (eILP) which helps students to gain a picture of:

- where they are
- where they want to get to
- and then helps them make plans to get there.

Through using Plan-it in your school you will be improving the support for learners as well as giving teachers the tools to support them effectively. The web-based system supports the delivery of the secondary curriculum, Every Child Matters agenda, Information, Advice and Guidance quality standards and the 14-19 agenda.

Learners create quality individual learning plans which:

- help to identify their skills, qualities and learning styles
- raise self awareness
- engage them in deciding the direction of their future learning
- help them realise their aspirations through action point setting

Teachers can use Plan-it to deliver personalised learning:

- engage students in setting SMART targets which are relevant to their own learning
- individual reports inform the advice and guidance given to students
- identify students of concern or in need of extra support
- access and contribute to a single student's ILP, even if they attend more than one provider

Head Teachers will have access to a range of valuable information:

- Students' opinions and feedback which can be collated providing a platform for student voice
- Reports which inform course provision, resource allocation and help to target support effectively

Learners say...

“ It made me realise I needed to start planning for my future ”

Teachers say...

“ It's helped students to focus on their future learning - to identify where they are at the moment as well as looking at their future needs ”
