

Quick start: Network managers

1. Introduction

Learners in your school will be using planning software called Plan-it in the near future. This document is designed to inform you of the requirements of Plan-it, as well as to hopefully provide S-cool with information about your network in order to support you most effectively.

2. System requirements

- Plan-it is a Web-based software application.
- Your network needs to be able to show any resources found under the domain **s-cool.co.uk**.
- Plan-it does **not** require the addition of any software to your school network.
- Plan-it is optimised for IE (Internet Explorer) version 7.
- Plan-it includes **pop-up windows** to support learners as part of the software.
- The Online Handbook for staff working with learners includes downloadable materials including .doc, .ppt and .pdf files.
- The software produces printable outputs. Therefore learners need to print from the network as part of the work they do in-class.

3. Additional support

If you feel that you would like further information before introducing Plan-it to your school network please contact the helpline on **01173 707000** (followed by option 1) or email data@s-cool.com or support@s-cool.com.
